QSONIX DEBUTS HI RESOLUTION MEDIA AND USB DAC SUPPORT AT ROCKY MOUNTAIN AUDIOFEST

THE ULTIMATE AUDIOPHILE MUSIC SERVER NOW SUPPORTS USB DAC'S
AND HI-RESOLUTION MEDIA UP TO 24BIT / 192KHZ

FOR IMMEDIATE RELEASE - September 29, 2009

DENVER, Colorado – Qsonix will be showcasing its latest system enhancements for the Q105 and Q110 series music servers, including support for third-party external USB DAC's (Digital to Analog Converters) and support for import and playback of high-resolution 24-bit audio.

These enhancements open the door for discerning audio listeners to take advantage of the increasing number of mid and high performance USB DAC's appearing in the market as well as enjoy the ultimate music experience with high-resolution audio from online sources such as AixRecords.com, Itrax.com, HDtracks.com, Linnrecords.com and others.

Qsonix will exhibit in room #561 in conjunction with DEQX, Legend Acoustics and Edge Electronics demonstrating a high-definition, digital audio system comprised of Qsonix media playback system, DEQX HDP-3 digital audio processor and four Edge G-Series linear analog amplifiers driving a stereo pair of the stunning Tikandi speakers from Legend Acoustics

Qsonix will also be featured as a source in the Wadia Digital display demonstrating its new USB interface and hi-resolution media support on a system featuring the Wadia Reference series 9 Decoding Computer system, Octave Audio amplification, Dynaudio loudspeakers, and XLO cables and power products.
